

Microsoft Excel Consulting: We Help You Get More Out of Excel.

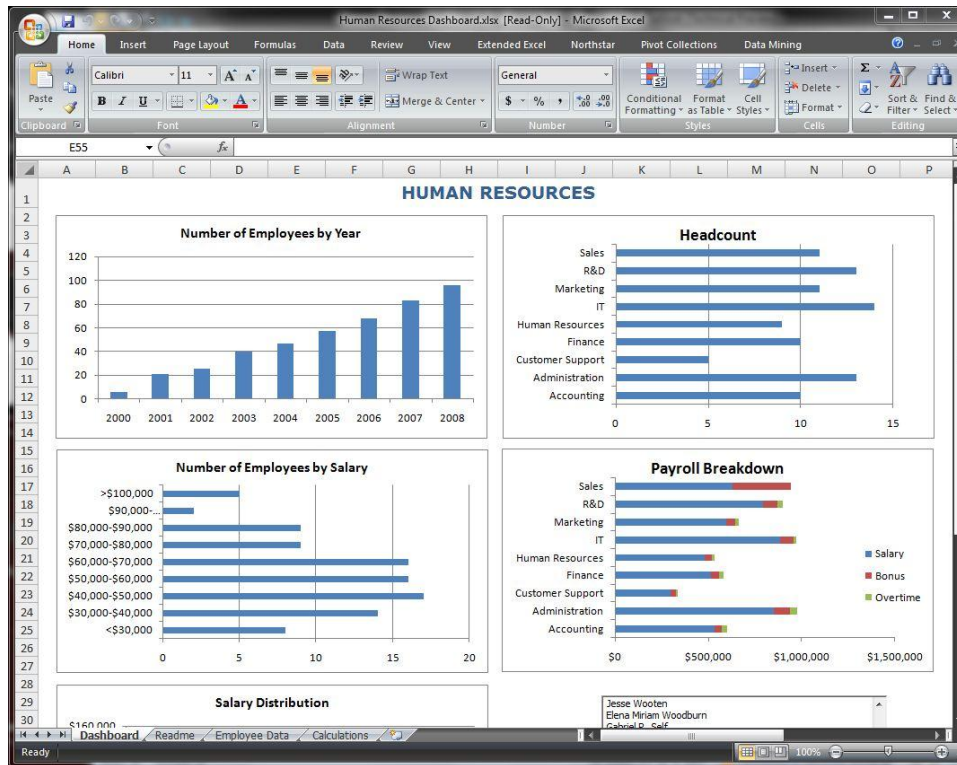

Fact Sheet

Services

Microsoft Excel is a powerful and widely used tool that helps people analyze information to make more informed decisions. From small business to enterprise class organizations, Excel is the primary tool managing the business from simple reporting to advanced budgeting and analytics. Most of these Excel based solutions are cobbled together quickly and become increasingly more difficult to maintain as the company grows. Most Excel users are self taught which means these spreadsheet solutions are poorly designed and not developed with scalability or reliability in mind.

At Extended Results, we help our customers get more out of Excel than was ever thought possible. From enhancing spreadsheet functionality, assistance with Formulas, Custom Solutions using VBA, to providing enterprise budgeting and forecasting solutions, we can help you achieve your business objectives. Using Excel and Excel Services, you can share and manage your analysis and insight with co-workers, customers, and partners with greater confidence and provide collaboration to your entire company.

Customer Encore

“WE BROUGHT IN EXTENDED RESULTS TO THINK CREATIVELY TO SOLVE OUR BUSINESS ANALYSTS EXCEL ISSUES. AT THE END OF A FEW SHORT WEEKS, EXTENDED RESULTS CREATED AN ORGANIZED, COLLABORATIVE AND ENHANCED EXCEL SOLUTION THAT WILL SAVE US OVER \$100,000 IN ONE YEAR! “

Our Experience

- **Collaboration:** Analyze your existing Excel spreadsheets and design new ways for collaboration within your organization.
- **Budgeting and Forecasting:** We work closely with business clients to design and prepare operating budgets and sales forecasts solutions in Excel to help company leadership manage business performance.
- **Enhanced Reporting:** We review your existing reporting spreadsheets and work towards a common framework and design that bring better visibility and more accurate data to your management team.
- **Application Development:** You can make Excel work like your business works, but you may need some help developing those features and functions. We are experts in VBA, C#, Macros and other Excel programming features.
